EDUCATION

Georgia Institute of Technology

Master of Science in Computer Science | GPA 3.5

Aug 2021 – May 2023

Atlanta, GA

National Cheng Kung University

Bachelor of Science in Computer Science | GPA 3.5

Sep 2015 – Jun 2020

Tainan, Taiwan

Courses: Machine Learning, Data Analytics, Blockchain, Network (TCP/IP), Info Security (TLS), Data Structure, Algorithm

EXPERIENCE

AeroTract, LLC

Software Engineer Intern

Sep 2023 – Jan 2024

Albany, OR

- Led the software development of a web app from scratch, saving engineers 300+ hours yearly by designing UIs for fine-tuning machine learning configurations using **TypeScript** and **React**. Implemented **REST APIs** and SDKs using **Python Flask**.
- Debugged and fixed long-existing frontend issues of an internal dashboard using **React**, **Bootstrap** and **JavaScript**.

Georgia Institute of Technology

Graduate Research Assistant

Aug 2022 – Dec 2022

Atlanta, GA

- Achieved SPMD parallel execution using **C++** parallel computing model **HClib**, **OpenSHMEM** and **MPI**, reducing runtime by over 50%. Studied the concurrency model **Actor model** for distributed asynchronous computations.
- Researched and built **HClib-Actor** programs using **C++**, then documented the semantics of the synchronization primitives.

Academia Sinica

Research Intern

Jul 2020 – Dec 2020

Taipei, Taiwan

- Constructed context-free parser using Brzozowski's derivative and **functional programming** with **Haskell**.
- Programmed a course website for the instructor to deliver materials to 100+ undergrads with **Haskell**.

PIXNET Digital Media Corporation

Data Analyst Intern

Aug 2019 – Dec 2019

Taipei, Taiwan

- Created dashboards to uncover marketing insights with **BigQuery**, **Data Studio**, **Python**, **R**, and **D3.js**.
- Automated the data import process from Google Sheets to **BigQuery** using **Matillion ETL** and **Python**.

PROJECTS

“Words” – Flashcard Maker | iOS Development, Spring Boot, JUnit, Object-Oriented Programming

Sep 2023 – Oct 2023

- Designed a native iOS app that turns word definitions into flashcards using **Swift**, **SwiftUI** and **MVVM** architecture.
- Created a **Java Spring Boot** backend following OOP principles, including developing **REST APIs** to service iOS and web client, and using **JPA** and **Hibernate** to query data from **Postgres**.

“Mini Reddit” – Content Rating System | Next.js, React, GraphQL, Server-Side Rendering

May 2023 – Jun 2023

- Developed a **Node Express** server with **Apollo GraphQL** middleware using **TypeScript**, backed by **Redis** and **Postgres**.
- Implemented the **GraphQL** schema and resolvers using **TypeGraphQL**, **TypeORM** and **TypeScript**.
- Built a server-side rendered **React** web client in **Next.js** and **TypeScript**, and used **cookies** to keep a user logged in.

“Simple Bank” – Banking Service System | Golang, AWS, gRPC, Microservices

Apr 2023 – May 2023

- Built a CI/CD pipeline using **GitHub Actions** to run automated unit tests written in **Golang**, create **Docker** image on **AWS ECR**, deploy the service to **Kubernetes** clusters on **AWS EKS**, and establish a production database on **AWS RDS**.
- Launched **Golang Gin** backend with **REST APIs** and backed by **Postgres**, and used **PASETO** for authentication.

“Taste” – Restaurant Finder | React Native, Mobile Application, Agile, Scrum

Oct 2022 – Dec 2022

- Collaborated with 2 developers in an **Agile Scrum** team to build the mobile app using **React Native** along with a **Flask** server and **Postgres**. Incorporated **Google Maps API** to display nearby recommended restaurants on a map.

“THE ONE” – Book Recommendation System | Machine Learning, NLP, Python, D3.js

Oct 2021 – Dec 2021

- Led a team of 6 to develop a book recommender system by creating NLP models using **Python**, **sklearn**, **pandas** and **NLTK**.
- Designed frontend with interactive visualization using **D3.js**, **JavaScript**, **HTML5** and **CSS3** to display popular books.

“Finance Hero” – A Simple Budgeting App | C#, .NET Application, Object-Oriented Programming

Jun 2018 – Jul 2018

- Led a team of 2 to build and design the app with a minigame inside using **C#** following OOP principles.
- Integrated the app with **Microsoft SQL Server** database to store user spending and game records.
- Visualized a user's monthly spending by category in pie chart with **ASP.NET** Chart control.

SKILLS AND CERTIFICATIONS

Languages: Java, JavaScript, TypeScript, Go, Python, C/C++, C#, Swift, SQL, HTML/CSS

Full-stack: Spring Boot, Hibernate, .NET, Flask, React, Redux, Next.js, Node.js, Express, REST API, GraphQL, gRPC

Technologies: Docker, Kubernetes, JUnit, Maven, IntelliJ, GitHub Actions, Linux, SQL Server, Postgres, MySQL, MongoDB, Redis

Cloud: AWS Certified Solutions Architect Associate (EC2, RDS, EKS), GCP (BigQuery, Data Studio)
